Summary

Frontend Developer with **3+ years of experience** building scalable, performant web applications using **React.js, TypeScript, and Next.js**. Specialized in Micro Frontend (MFE) architecture, reusable component systems, and state management with Redux/RTK Query. Maintainer of an open-source React component library adopted across enterprise applications. Experienced delivering enterprise-grade UI in Agile teams with a strong focus on performance optimization and design consistency.

Technical Skills

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js (18/19), Next.js, Redux Toolkit, RTK Query, Context API, React Router, HTML5, CSS3, SCSS/SASS, Tailwind CSS, Bootstrap, Material UI

Architecture & Tools: Micro Frontend (Module Federation), Storybook, Webpack, Vite, Parcel, PNPM Workspaces, Git, GitHub, Bitbucket

Concepts: Performance Optimization, Core Web Vitals, Code Splitting, Lazy Loading, Memoization, Virtualization, Web Workers, API Caching, RBAC, Accessibility (WCAG), Responsive Design, Component-Driven Development, Agile/Scrum

Testing & Design Collaboration: Jest, React Testing Library, Figma

Working knowledge of: Node.js, Express.js, MongoDB (REST API integration)

Experience

FireFlink Pvt. Ltd.

Bengaluru, India

Software Engineer II

July 2024 – Aug 2026

- Engineered a scalable Micro Frontend architecture enabling independent deployment across 5+ enterprise modules, improving frontend maintainability and release velocity.
- Led adoption of a Storybook-based reusable component library, standardizing UI development across multiple Micro Frontend applications.
- Built reusable React components using React Hooks, TypeScript, Redux Toolkit, RTK Query, and Context API.
- Optimized rendering performance using memoization, virtualization, lazy loading, Web Workers, and efficient state management techniques; audited and improved Core Web Vitals using Chrome DevTools and Lighthouse.
- Improved application accessibility by implementing WCAG-compliant components, semantic HTML, keyboard navigation, and ARIA attributes across key modules.
- Wrote unit and integration tests using Jest and React Testing Library, and collaborated with designers in Figma to ensure pixel-accurate UI implementation.
- Collaborated with backend teams on REST API integration for authentication, RBAC, and workflow management modules, and contributed to SSR-based reporting features using Node.js.
- Mentored four junior developers through code reviews and React performance optimization best practices.

Test Yantra Pvt. Ltd.

Bengaluru, India

Software Engineer

May 2023 – June 2024

- Developed responsive and reusable UI components using React.js, JavaScript, HTML5, CSS3, and SCSS.
- Integrated REST APIs and implemented dynamic forms, tables, filters, dashboards, and data visualization components.
- Optimized application performance while ensuring cross-browser compatibility and responsive layouts.
- Managed application state using Redux and collaborated in Agile sprint planning and feature delivery.

Test Yantra Pvt. Ltd.

Bengaluru, India

Software Development Trainee

Dec 2022 – May 2023

- Underwent hands-on software development training, working on guided coding assignments and mini-projects under senior developer mentorship to build practical proficiency in web development fundamentals ahead of transitioning into the Software Engineer role.

Projects

FireFlink | *React.js, TypeScript, SCSS*

fireflink.com

- Developed reusable React components and enterprise UI features for a scriptless NLP-powered automation platform supporting web and mobile testing.

Pixel-React | *React.js, TypeScript, Storybook*

npm package

- Primary publisher and maintainer of an open-source React component library built with Storybook and TypeScript, with 6K+ npm downloads and adoption across enterprise applications.

FireFlink Assessment | *Next.js, React.js, REST APIs*

assessmentv3.fireflink.com

- Built SSR-powered features using Next.js for online assessments, certificate generation, and SEO optimization.

Leavera | *React.js, Redux, REST APIs*

leavera.com

- Built the React-based frontend for a leave management system, implementing RBAC-driven UI, Comp-Off tracking views, and approval workflows integrated with REST APIs.

Education

Rajiv Gandhi Technical University

Bachelor of Engineering (B.E.)

Bhopal, Madhya Pradesh

Aug 2016 – Sep 2020
